# Tutorial: How to Set Up and Use the Resume Parser API

**1 Install & Set Up PostgreSQL**

- Download and install PostgreSQL from the official website.
- Create a new database (e.g., resumedb).
- Set up a user with a password and grant privileges

**2. Create the Enviroment**

python -m venv .venv

venv/scripts/activate

**3. Install dependencies**

pip install -r requirements.txt

4. Start FastAPI:

uvicorn main:app --reload

An uploads folder is created to store the resume temporarily

5. Upload the resumes in 127.0.0.1:8000

6. See the resumes in tables in 127.0.0.1:8000/history
